DAAD Summer School
at the PICB in Shanghai, China

Methods from Mathematics
and Computer Science
for Pattern Recognition in Biology

September 30 to October 13, 2007
Shanghai, China

CAS-MPG Partner Institute
for Computational Biology

To apply: www.picb.ac.cn/pattern07

This summer school presents the latest state-of-the-art in the fields of combinatorial, algebraic, and statistical methods in pattern recognition as well as their applications in bioinformatics. The summer school particularly addresses students at doctorate level from Asian countries.
